THE

ELECTRICAL WORLD

A REVIEW OF CURRENT PROGRESS IN ELECTRICITY
AND ITS PRACTICAL APPLICATIONS

VOLUME LV

JANUARY 6 TO JUNE 30, 1910

NEW YORK

ELECTRICAL WORLD

INDEX TO VOLUME LV

GENERAL INDEX

Entries from the Digest of Current Electrical Literature are indicated by D (Digest) and D R (Digest Reference)

A

Accounting:
——Depreciation and reserve funds. By W. B. Jackson, 1186; Comment, 1101
——Detroit system. By E. J. Bowers, 1474
——Small companies and uniform accounts, 1514
——Storeroom accounting, 1473
——Symbols. By A. S. Holme, 1471.
——System for small plants. By Thos. Pitts, 950
——Uniform, N. E. L. A., report on, 1475
——Work-orders and time cards, System of, *627
Acetylene tetrachloride. By J. H. Vogel, (D.) 420
Acheson, E. G., Perkin medal to, (D.) 480
Acrometer. By J. Reyval, (D.) 1671
Advertising:
——Chicago, *1069
——Cleveland, Ohio, 888
——Co-operative lamp campaign, 1718
——Follow-up advertising, 694
——Motor for store bright work, *472
——National advertisers. By F. B. Rae, Jr., 1471
——N. E. L. A. report, 1435, 1470
——St. Louis, 751, *1283
——Technical advertising. By J. J. Rockwell, 1672
——Westinghouse Co., 410
Africa, Magnetic survey of, 346
Agriculture, Electricity in:
——American farming conditions. By P. A. Bates, 171; Frank Koester, 476
——Cost of electricity. By K. Krohne, (D.) 1726
——Electricity on the farm, 20. By Herman Russell, 1465
——European applications of electric power, *40
——Fargo, N. D., 1538
——Germany, (D.) 1723
——Illinois farm of C. W. Broughton. Gas producer power plant with storage battery auxiliary, *280
——Illinois farmer's plant, *1126
——Indiana, on the Elkhart River, Low-head plant for supply of electricity in a rural community, *872
——Indiana supply to farmers near La Port, 357
——Transmission plants for agricultural districts. By Marx, (D.) 1547
——Wind-mill and storage-battery plant, Poynette, Ind., 1055
Air condenser, New, (D.) *122
Alloy for electrical instruments. By C. W. Leavitt, 1666
Alter, David, an early electrical inventor, 800
Alternating-current circuits:
——Compounding, Stanley patent, *344
——Voltage regulation for. By E. Ruehle, (D.) 62
Alternating-current problems:
——Application of symbolic equations; Problems involving star-connected three-phase circuits. By H. P. Wood, *1597
——Symbolic methods of solving. By G. E. Marsh, 1596; Comment, 1570
Alternating-current systems, Paralleling. By P. M. Lincoln, (D.) 1319
Alternating currents:
——Power of, Determining, from oscillographs. By E. Behne, (D.) 1395
——Theory. By C. Breitfed, (D. R.) 704
Alternators (See Generators)
Aluminum:
——Production in France. By Pitaral, (D.) 761
——Production in the laboratory. By Neumann and Olsen, (D. R.) 897
——Properties of, and its application. By P. Roland, (D.) 121, 704
——Resistivity of. By H. Pecheux, (D.) 1548
Aluminum-cell protective devices, British patent, (D.) 1078
Aluminum-copper alloys. By W. Bronieski, (D. R.) 63
Aluminum joints, (D.) 1158
American Bell Telephone & Telegraph Co., Annual report, 671
American Electrochemical Society, May meeting, 739, 1181, 1189, 1249
American Institute of Electrical Engineers:
——Annual convention, 1426, 1634
——Annual dinner, 504
——Armour section, 346
——Charlotte, N. C., meeting, 852; Comment, 841
American Institute of Electrical Engineers: (Continued)
——Fort Wayne section, 680
——Ithaca section, 602
——Joint meeting with I. E. S., 728
——Lewis Institute section, 1527
——Meetings, 336, 602
——Montana section, 1440
——Officers, 1374
——Pacific Coast power plant trip, 1366
——Pittsburg section, 740
——San Francisco meeting, 728, 1042, 1246
——Special meetings, 88
American Physical Society, 614
American Railway Engineering & Maintenance-of-Way Association, 795
American Society of Mechanical Engineers:
——Convention at Boston, 1521
——Students' section of University of Wisconsin, 100
Ammeters:
——High-frequency current ammeter, Babcock patent, *859
——Mercury internal-pressure, *767
Arc, Temperature and voltage of. By C. D. Child, (D.) 895
Arc lamps:
——Abbey double-electrode, (D.) *1157
——Beck lamp. By H. Lux, (D.) 119
——Bremer patent, 504, (D.) 634
——Comparisons of luminous and other arc lamp systems, 1071
——Comparison of various lamps. By W. D'A. Ryan, 1460
——Electrodes. By I. Ladoff, (D. R.) 119; 458
——Flame:
Abbey, Improvements, (D.) *569
"Beacon," (D.) 61
Energy consumption. By Gualerzi and Heyck, (D.) 119
Foster multiple-electrode, (D.) 303
General Electric, 18-amp, *1396
Hawthorne, construction and operation. By L. J. Auerbacher, *1327
"Main" double intensive, (D.) 1318
Novel lamp. By W. Wedding, (D.) *303; Comment, 256; P. A. Mossay, (D.) *569
——Intensified arc lamp for indoor lighting. By Louis Friedman, 951
——Inverted enclosed, British, (D.) *1489
——Low-frequency arc lighting, Hamburg station, (D.) 303
——Magnetite lamp. By Louis Friedman, 988
Comparisons with other arc lamp systems, 1071
——Mercury electrode, Steinmetz patent, *698
——Molybdenum electrodes, Thomson patent, 1719
——"Multax," (D.) *819
——Progress in, (D.) *956
——"Tetra" lamp. By A. Plance, (D. R.) 61
——Three-phase lamp with four electrodes. By A. Righi, (D.) *1157
——Types of lamps and their application. By A. Angold, (D.) 569
——Variations of the light of. By E. Presser, (D.) *703
Architect's specifications for electrical work. By W. S. Jones, 815; C. F. Smith, 1015
Arkansas Association of Public Utility Operators, Annual convention, 1114
Armatures:
——Connecting armature, 560
——Detection of faults in small motor armatures. By C. Nosrac, *1298
——Measuring the movement of inertia of a direct-current armature. By G. Kapp, (D.) *417
——Testing for faults, Methods, 51
Armour estate, Melody, Ill., power plant, *160
Association of Railway Electrical Engineers, 862, 1577
Association of Railway Telegraph Superintendents, Convention, 1635
Atmospheric electricity. By Elihu Thomson, (D. R.) 306; W. W. Strong, (D.) 706
Atmospheric nitrogen. (See Nitrogen.)
Atoms and molecules. By W. A. Noyes, (D.) 173
——Forces between. By R. D. Kleeman, (D.) 1611
Austria, Electrical industry in. By E. Honigman, (D.) 1610, 1726
Automobile business of central stations. (See Central-station business)
Automobile electric lamp, *314
Automobile garage operation in Boston, 1070
Automobile Manufacturers, Association of Licensed, Annual show, 90
Automobile Show, New York, 127
Automobiles:
——Charging electric, gas-producer plant vs. central-station service, Comparison of cost. By R. D. Donaldson, 167
——Commercial electric vehicle at the close of 1909. By J. H. Vail, *572; 899
——Cost of running electric, 294
——Discussion of the electric vehicles at Boston, 610
——Duplicate storage batteries for electric, 903
——Edison storage battery. By W. E. Holland, *1080
——Energy consumption of electric vehicles, 167
——Extension-ladder automobile for trimming arc lamps, St. Louis, *1285
——Gasoline, electrical shop tests, *824
——High-speed, single-motor drive for electric. By H. S. Baldwin, (D. R.) 1158
——Lighting, Electric. By R. E. Scott, (D.) 123; *709, *1024
——Mileage record by electric truck, 1337
——New York Automobile Show, 127
——Operation of electric cheaper than use of horses, 86
——Possibilities of the electric vehicle, Discussion, Electric Vehicle and Central-Station Association, 1580
——Progress of electric vehicles in 1909, 11, 99
——Two-motor vs. one-motor equipment for electric. By J. D. Farrer, 848
Autotransformer circuits, (D.) *635
Autotransformers, Starting. By E. F. Gehrkens, (D.) 636
Averaging instrument for circular chart records, *1674
Ayrton memorial. By W. A. Del Mar, 1607

B

Balancers for three-wire systems. By A. G. Cooper, (D.) 635, 703
Ballistic measurements. By E. Behne, (D.) *572
Baltimore:
——Legislation against central station, 506, 666
——Street lighting bids, 1119
Baltimore Electrical Commission, Work of, 93
Baltimore Electrical Contractors' Association, 149
Baltimore Sons of Jove, 400
Banks for promoting electrical enterprises:
——New Jersey organization, 1107
——Zurich Electro Bank. By E. Walch, (D.) 421; Comment, 385
Barretter, Use as indicator in electric oscillation systems. By W. Kempe, (D. R.) 1222
Battery charging set, General Electric, *825
Battery plates, Barium for impregnating, 29
Batteries, Dry, Reviving exhausted, 1480
Baum, Frank G., Sketch of, *995
Bearings of electric machines, Currents in. By L. Adler, (D.) 1667
Bell, Louis, *28
Bell for mines, *1338
Bells connected to supply circuits, (D.) *820
Bemis, E. W., head of New York City Electrical Department, 24
Bending of large iron conduit. By G. H. Westerman, *169; G. Thompson, 417
Beta rays, Absorption of. By W. A. Borodowsky, (D.) 1221
Bill board lighting. (See Sign and decorative lighting)
Blast-furnace gases, Electric power from, and cost of energy. By I. V. Robinson, (D.) 895; R. Porkorny, (D) 1723
Block signal statistics, 1574
Boats, Gasoline-electric, Germany, (D.) 419
Boiler furnaces, tile-roof, Tests of, 516
Boilers:
——Feed pumps, Defective. By C. R. McGahey, *886
——Feed-water, Treatment of. By E. G. Bashore, (D.) 235, 882
——Heat transmission in. By W. E. Dalby, (D.) 171
——Introducing solvents into boilers. By George Warner, *49
——Scale, Prevention and removal of. By W. H. Wakeman, *46, *286
——Soot on tubes, Effect of, on performance of boiler, 1480
Book reviews:
——Copper Handbook, 959

*Indicates illustrated articles.

212988

Book reviews: (Continued)
——Electric Power-Plant Engineering. By J. Weingreen, 480
——Electric Power Plants. By T. E. Murray, 1492
——Electrical Engineer's Pocketbook, 763
——Electricity for Engineering Students. By H. M. Hobart, 1321
——Engineering Index Annual, 1396
——Fields of Force. By V. F. K. Bjerknes, 1550
——Garcke's Manual of Electrical Undertakings, 1321
——Handbook for Wireless Telegraph Operators, 123
——Hydroelectric Developments. By Preston Player, 1612
——Hydraulic Elevators. By William Baxter, Jr., 1551
——Manual for Engineers, 480
——Maver's Wireless Telegraphy and Telephony, 480
——Millwrighting. By J. F. Hobart, 480
——Miscellaneous Tests of Electric Car Equipment. By E. C. Parham and J. C. Shedd, 1550
——Modern Progressive New Business Methods, 1322
——Motor Control. By Andrew Olsson, 123
——Popes and Sciences. By J. J. Walsh, 1322
——Practical Irrigation; Its Value and Cost. By A. J. Bowie, Jr., 959
——Telephonology. By R. H. Van Deventer, 763
——Theory of Elections. By H. A. Lorentz, 1613
——Thirteenth the Greatest of Centuries. By J. J. Walsh, 1322
——Valve Setting. By H. E. Collins, 1321
——Vehicles of the Air. By Victor Lougheel, 123
Boosters and balancers, Direct-current. By W. A. Ker, (D.) *172, (D. R.) 304
Boring machine for wiremen, Garretson, *309
Boring mill, Colburn, *960
Boston:
——Automobile Show, 641
——Electrical progress in 1909, 1244
——Electrification situation, 1044, 1110, 1186
——Engineering societies' dinner, 204
——Engineers' headquarters proposed, 1635.
——Manhole explosion case, 611
——Opera House, Electrical equipment, *1197
Boston Edison Employees' lecture course for 1910, 29
Bow contact vs. the trolley rod, (D. R.) 172
Brake, Electromagnetic railway, Westinghouse, (D.) 1393
Brake blocks, Best materials for, (D.) 234
Braking, Electric, in Glasgow. By A. Gerrard, (D.) 1077
Brick making, Electricity in, Chicago Brick Co., 525
Bridges:
——Electrically-operated, vertical-lift, Chicago, 609, *938
——Queensboro bridge illumination, *276
British Institution of Electrical Engineers, (D.) 65
Brooklyn Edison Sales Department, Annual Dinner, 730
Brownian movements. By I. Perrin, (D) 1726
Brush, Charles F., visits his old laboratory in Cleveland, 310
Brush discharge from transmission lines. By E. A. Watson, (D.) 570
Brushes:
——Carter patent, (D.) 418
——Contact surface, 1139
Brussels World's Exposition, (D. R.) 1223
Buffalo Electrical Contractors' Association, Officers, 216
Byllesby companies, House-wiring campaigns, 359
Byllesby engineering convention, 342

C

Cables:
——Breaks, Electric localization of. By E. Raymond-Barker, (D. R.) 1079
——Construction of. By F. Fernie, (D. R.) 420, 478
——Dielectric properties of high-tension cables. By M. Hoechstaedter, (D.) 1490, 1548, 1610, 1669
——Electrolysis of. By F. Fernie, (D.) 1490, 1610
——Fault location. By W. A. Durgin, 1456
——Faults, Instrument for locating, Matthews, *1342
——Jointing of lead coverings for cables, *697
——Mines, Cables in. By J. P. Simpson, (D.) 304
——Submarine, Gray patent, (D.) 1671
——Submarine, Waterbury, *481
——Twin cable with ground wire, 1484
——Underground distribution. By W. E. Hazeltine, (D. R.) 1158
——(See also Transmission, Electric; Wires and wiring)
Calcium carbide. By M. deKay Thompson, (D. R.) 1158
California municipal plants, 261
Calorimeter for power-gas testing, Fery, (D.) 1079
Canadian electric energy, Exportation of, 1518
Canadian Hydroelectric Commission news, 95, 267, 344, 797
Canadian hydroelectric power distribution, Map of, 267
Canadian waterways treaty, 789
Canal haulage, Electric France, Canals du Nord. By A. Palliere, (D.) 1319
Canal rays. By W. Wien, (D. R.) 1394
Cancer, Electrical treatment of, 935
Candle-power (See Photometry)
Capacity, Standards of, (D.) *122
Capacity standards for high frequencies. By J. A. Fleming. (D) *64
Car lighting. (See Train lighting)
Carbon, Fusion of, by means of the musical arc. By M. La Rosa, (D.) 897
Carriage call, Electric, *766
Cars:
——Edison-Beach electric railway, *212
——Gasoline-electric, Prussian-Hessian State Rys. By G. Brecht, (D.) 1724
——Storage battery:
Compared with gasoline-electric cars, New York, *994
Experience with. By M. Büttner, (D) 1724
Catenary construction (See Transmission, Electric)
Cells:
——Dry cells:
Rating and testing of, 51
Szek, (D.) *896
Tests at the Reichsanstalt, (D.) 121
Tests, Standard, in England, (D.) 1021
——Edison primary, Reason for oil on solution, 51
——Voltaic cells. By E. H. Landis, (D. R.) 173
——Weston standard. By F. E. Smith, (D.) 897; G. A. Hulett, (D. R.) 1550
Census report, 1516, 1572
Central Colorado Power Co., 202, *217, 272, *1649, *1705
Central station business:
——Accounting (See Accounting)
——Advertising (See Advertising)
——Automobiles:
Campaign methods. By W. P. Kennedy, 848
Chicago, 54
Comparative cost data of electric vehicles and lamps, 410
Comparative records of the operation of electric and horse vehicles, 110
Electric vehicle opportunity. By Hayden Eames, 1468
Relation of electric vehicles to central station business. By O. M. Rau, 295; J. C. Hutchings, 732; 1111
St. Louis, 847, 1279
——Baltimore, Tungstens, 293
——Bill discounts, Marianna, Ark., 1481
——Bill forms, Pine Bluff, Ark., *1386
——Billing and accounting, St. Louis, 1282
——Cincinnati new-business department, 471
——Chicago, Four hundred contracts a day, 1303
——Collecting bills, Fort Wayne, Ind., 52
——Collection bureau, Workings of a. By J. C. Van Duyne, 1472
——Combined industrial power and lighting plant, North Manchester, Ind., *870
——Commercial department, prompt execution of orders. By C. N. Stannard, 1465
——Commercial side of central station work. By A. S. Huey, 1468
——Competition of the tungsten with gas, 358
——Complaints, Diplomacy and detective work in settling, 411
——Complaints, Handling and enforcing discount dates. By W. R. Putnam, 298
——Consumers' accounts and billing methods, 410, 412
——Cooking question, 1104
——Co-operation with contractors, St. Louis, 755
——Costs and high-efficiency lamps. By S. E. Doane, 1466; Comment, 1423
——Customers' accounts, Care and handling of. By J. M. Mulvihill, 1473
——Customers' accounts, Little Rock, Ark., 1481
——Customers' records, Keeping of. By R. F. Bonsall, 1472
——Day loads, Securing profitable. By J. E. Harsh, 1147
——Dayton, Ohio:
Booklets, 1538
High load factors, *696
Household appliances, 52
Tungsten campaign, 52
——Denver:
Gasoline competition, 226
Toaster campaign, 293
——Des Moines, Ia., Billing 25 days a month, 472
——Developing business. By R. W. Clark, 850, 949
——Development along industrial lines, 17
——Drug stores, Agencies in, Chicago, 947
——Economical features of high-efficiency lamps. By A. M. Stratton, 1316
——Exhibit at St. Louis Electrical Show, *1541
——Exhibits in residential sections, Public Service Corporation, New Jersey. By W. H. Stuart, *1142
——Fayetteville, Okla., Iron for each consumer, 1302
——Fireless cookers, 1301
——Flatirons. Effect of, on residence rates, 1600
——Fort Wayne, Ind., Unsatisfactory results of municipal operation, 751
——Galena, Ill., 947, 1010
——Galva, Ill., Sale of municipal plant, 1140
——Gas competition in small towns, 387, 1717
Central station business: (Continued)
——Gasoline competition:
Elimination of. By J. T. Connors, 55
How to meet. By J. H. Boughton, 695
Methods, 1304
——Haverhill, Mass., Window and sign lighting, 109
——Heating, St. Louis, 1280
——Heating and cooking business, Extension of, 1067
——Heating devices loaned to social gatherings, Chicago, 1141
——Holdenville, Okla., Ironing-day service, 1302
——Hot Springs, Ark., Energy consumption in, 1301
——Ice-making (See Refrigeration)
——Income and sales classification. By W. W. Dow, 1474
——Industrial load for central stations, 502
——Inspection of customers' services. By A. G. Strickrott, 1466
——Irrigation pumping, Mount Whitney Power Co., 1247
——Irrigation pumping, Northern Colorado Power Co. By E. C. Reybold, Jr., *863
——Isolated plant competition in St. Louis, 1279
——Job or work order system. By R. D. Rubright, 1474
——Loads, Average and maximum, in 20 stations of various capacity. By A. D. Adams, 1300; Comment, 1241
——London publicity scheme, 227
——Marquette, Mich., Flat irons, 1717
——Metallic-filament lamps, Effect of, on Harrogate station. By Wilkinson and McCourt, (D.) 120
——Meter rents and minimum rates. By A. D. Adams, 525; Comment, 502
——Minimum bills and service charges, 562
——Montgomery, Ala., Campaign for new business, 357
——Montpelier, Vt., Electric power at, 293
——Motor applications. By Harry Glass, 1144
——Motor business, Method of soliciting, Chicago, 626
——Motor business, Summer, in New England, 536
——Motor drive and factory location, 812
——Motor installation records, 1141
——Motor load for central stations, 501
——Motor loads and incomes of sixteen stations. By A. D. Adams, 107; Comment, 87
——Motor load, Modern methods of increasing. By Spence and Bullard, 563
——Motor renting, small motors, 411
——Motor-service business, Developing. By J. C. Parker, (D.) 478
——Motor-service engineering, Providence, R. I. By E. R. Davenport, 734; 752, 842, 1482, 1540
——Motor service rates and their effect on station economy. By A. E. Walden, 527
——Moving pictures, Central station use of, *1068
——Municipal ownership, Cost, Fairview, Okla., 1302
——Muskogee, Okla., Flat irons as premiums, 1302
——New business discussion at Nebraska convention, 1387
——New business promotion and going value, 256; W. H. Bryan, J. L. Vinton, 416
——New York companies and cash deposits, 508
——New York, Statistics, 146
——Non-peak contracts, Dayton, Ohio, *696
——Off-peak load, Securing. By H. G. Glass, 1145
——Pilot lamps as a means of reducing meter bills. By J. Franz, 883
——Policy, A winning, 256
——Printed matter on meter bills, 53
——Providence:
Appliance exhibit, *1554
Tungsten lamp increases station output, 360
——Pumping contract at Harvard, Ill., 1600
——Quincy, Ill., Day load, 1717
——Quincy, Mass., Effect of tungsten lamp introduction, 227
——Reducing production costs, 628
——Reflectors, Cost of, and consumers, 471
——Residence lighting. By H. J. Gille, 1435, 1469
——Restricted hour supply in England, (D.) 1393
——St. Louis, Union Electric Light & Power Co., 1277
——St. Paul, South, Tungsten experience, 293
——Sales department organization. By T. I. Jones, 1467
——Sales department of West Ham, England, Station. By Glenn Marston, 166
——Sales hints, 695
——Small consumers, Distribution of energy to, London, (D.) 419
——Small consumers, Needs of. By Martin Hall, 1155
——Springfield, Ohio, Electric drive vs. gas engine. By J. E. North, *888
——Statistics, Significance of. By McKana and McGuire, 1471
——Tactful relations with customers. By J. W. Ferguson, 1212
——Toasters at forty cents a month, Chicago, 888
——Toronto, Ont., Off-peak load campaign, 471
——Trading stamps, Hot Springs, Ark., 1481

*Indicates illustrated articles.

Central station business: (Continued)
——Tungsten lamps:
Handling lamps, 890
Introduction of. By S. E. Doane, 1146
London, Effect on business, 948
Ratio of power load installed to lamps installed. By Spence and Bullard, 889
Special house-wiring proposition, Northern Connecticuut Light & Power Co., 57
——Vacuum cleaning, 1481
——West Ham, England, sales department. By Glenn Marston, 166
——Williams, Ia., Small town, 1140
——Window display, "Wireless," 1211
——Wiring (See Wires and wiring)
——Worcester, Mass., Motor-service situation, 96, 228
——(See also Charging for electric current)
Central Station Development Co., 576, 813
Central station distribution, 1240
Central station output and productive economy, 1244
Central-station practice:
——Blast-furnace gases, Electric power from, and cost of energy. By I. V. Robinson, (D.) 895
——Charlotte, N. C., Gas-engine service. By E. D. Latta, Jr., 853
——Chicago maximum load, 100
——Concrete and cement in stations. By H. N. Muller, (D.) 367
——Cost of maintenance, 1067
——Cost o fproducing electrical energy. By H. Bergmann, (D.) 172
——Costs, Effect of increased output and of motor load on, 1245
——Design and arrangement of machines and apparatus. By M. H. Collbohm, 665
——Developments of 1909, 4, 5
——Direct-current vs. three-phase currents. By W. Wunder, (D.) 895
——Diversity factor in electrical distribution. By H. B. Gear, *927
——Economies of a small station, Gardner, Mass., 874
——Economy in operation of power plants. By Paul Winsor, I. N. Hollis, 97
——Engine economy. Methods of improving. By William Westerfield, 876
——Financial equations for central stations. By L. Crough, (D.) 234
——Gas producer plant, Cost of small, 1601
——Gas producers and gas engines, N. E. L. A. discussions, 1432, 1453
——Germany, Economy in large cities. By R. Kitschelt, (D.) 1490
——Heat units per kw-hour in a medium size plant, 410
——Operating a lighting plant in connection with another industry. By M. C. Lord, 48
——Organization problems, 1103
——Over-all efficiency of electric plants. By H. B. Shaw, 1143
——Parallel operation of hydroelectric plants. By W. S. Lee, 855
——Power plant reports and routine in Nebraska, 1387
——Railway supply from central stations. By H. E. Yerbury, (D.) 419
